PAVEL CHERKASHIN

Developer Advocate & Partnerships (DevRel) • MCP Ecosystem • Technical Content & Integrations

San Francisco, CA (PT) | pavel@mindrock.capital | linkedin.com/in/pavelcherkashin | github.com/minutta | x.com/cherkashin

Operating Focus: *"Bridging the Model Context Protocol (MCP) ecosystem through high-impact technical demos, dev-tool partnerships, and authentic developer advocacy. Combining hands-on agent infrastructure development (fleetd daemon, MCP server implementations, coding-agent tooling) with high-level enterprise partnership pedigree (Siebel Systems country leadership, founder of #1 systems integrator Sputnik Labs with 500+ engineers, university textbook author). Based in San Francisco, ready to champion Manufact Cloud and the mcp-use SDK across conferences, hackathons, and partner ecosystems."*

CORE DEVREL, PARTNERSHIP & TECHNICAL CAPABILITIES

- **MCP Architecture & Tool Ecosystems:** Deep architectural understanding of Anthropic's Model Context Protocol (MCP); building MCP servers, tool definitions, resource providers, and client connectors across Claude, ChatGPT, and autonomous coding agents.
- **End-to-End DevTool Partnerships:** Veteran partnership builder connecting SDKs with dev-tool ecosystems, cloud hosting platforms, IDE extensions, and API providers; structuring joint webinars, co-built integrations, and co-marketing launches.
- **Multi-Format Technical Content:** Proven creator of high-engagement technical documentation, step-by-step video tutorials, open-source reference implementations, interactive demos, and architectural deep-dives across X, GitHub, and YouTube.
- **Public Speaking & Developer Community:** Experienced keynote speaker, podcast guest, and meetup host; engaging technical audiences from early-stage AI founders to enterprise platform architects with authenticity and engineering rigor.
- **Full-Stack Systems Engineering:** Hands-on fluency in TypeScript/Node.js, Python (FastAPI/Pydantic), Go/Rust, Next.js, Docker, and cloud deployments; rapid prototyping of live interactive demos and SDK sample apps.

DEVREL, PARTNERSHIPS & SYSTEMS LEADERSHIP EXPERIENCE

Mindrock Autonomous Agent Mesh — *Principal Systems Architect & Ecosystem Lead* | 2024 – Present

- Engineered distributed autonomous agent orchestration with native MCP integration (Linear MCP server, GitHub tool calling, dynamic resource inspection, and sandboxed execution runtimes).
- Authored open protocol specifications (Protocol Phi, xHTTP standards) and developer guides; spearheaded cross-agent verification harnesses combining programmatic assertions and LLM-as-judge scoring.
- Created reproducible developer templates, live demo harnesses, and technical writeups tracking autonomous agent state machines and tool reliability.

Sputnik Labs — *Founder & Chief Executive* | Enterprise Integration & Developer Solutions

- Built and scaled Eastern Europe's leading systems integration firm (500+ engineers), managing deep strategic alliances and developer partner programs with global software vendors (Siebel, Oracle, Microsoft).
- Directed technical evangelism and developer enablement for mission-critical enterprise platforms across the 3 largest European banks and major telecom operators, architecting high-volume transactional integrations.
- Authored the definitive university textbook on CRM and enterprise automation systems; delivered keynote lectures and training programs across academic and industry forums.

Siebel Systems — *Country Manager & Enterprise Solutions Director* | Platform Alliances

- Spearheaded regional ecosystem growth, system integrator alliances, and technical advocacy for the premier enterprise software platform; led technical workshops and C-level architecture briefings.
- Cultivated developer and consulting communities around complex integration APIs, data synchronization protocols, and enterprise backend architectures.

Vestor.in & Technology Ventures — *Founding Partner & Tech Evangelist* | 2018 – 2024

- Advised and invested in early-stage developer tools, AI infrastructure, and cloud startups across Silicon Valley; mentored technical founders on developer go-to-market and open-source growth.
- Hosted developer meetups, demo days, and founder roundtables in San Francisco; built broad networks across frontier AI labs, accelerator communities, and venture ecosystems.

EDUCATION, ECOSYSTEM RECOGNITION & AVAILABILITY

- **Academic Background:** BS & MS in Computer Science / Systems Engineering • Author of authoritative university textbook on enterprise customer automation.
- **Location & Global Mobility:** Based in San Francisco, CA (PT) • Active in SF AI builder community • Available for domestic and international conference travel, hackathons, and customer onsite visits.
