PAVEL CHERKASHIN

Community Communications Lead • Operator-Storyteller • 6-Month Comms Automation Arc

San Francisco, CA (Hybrid / Relocation) | pavel@mindrock.capital | linkedin.com/in/pavelcherkashin | github.com/minutta

Operating Thesis: *"Automating communications operations—story sourcing, editorial cadence, distribution reach, and sentiment telemetry—while fiercely preserving human judgment, cultural taste, trust, and authentic community voices. Bringing OpenAI products closer to everyday communities by propelling AI out of tech subcultures into mainstream culture (sports, music, design, food, fandoms) on a disciplined 6-month arc."*

STRATEGIC FOCUS: COMMUNITY-FIRST NARRATIVES & CULTURAL CROSSOVER

OpenAI is at an inflection point: transitioning from developer novelty to essential everyday fabric across global society. True earned media is not won through dry product feature announcements, but by illuminating the human builders, small business owners, students, and creative communities whose lives are transformed by AI. As an operator-storyteller who has conducted 5,000+ deep founder interviews, authored university textbooks, spearheaded regional tech ecosystems, and built autonomous agent workflows, I align narrative strategy from campaign inception. I connect decentralized community stories into enduring cultural narratives—bridging technical precision with popular resonance across music, culinary arts, sports, and grassroots builder fandoms.

THE 6-MONTH COMMS AUTOMATION ARC (OPERATIONAL PRIORITIES & MILESTONES)

Months 1–2 **Sourcing & Radar**	**Community Sourcing Engine & Cultural Radar:** Deploy automated discovery pipelines to source high-impact builder, student, and small-business stories. Establish cultural listening radar across non-tech verticals (sports, music, industrial design, culinary arts). Codify authentic voice guidelines: human-first tone, zero corporate puffery, and strict technical accuracy on AI capabilities and boundaries.
Months 3–4 **Campaigns & Voices**	**Cultural Campaigns, Earned Attention & Regional Hubs:** Execute sustained multi-month narrative arcs moving AI into popular culture. Partner with regional comms teams to localize creator stories globally. Turn community participation into the core story through interactive campaigns, earned media features, and trusted spokesperson representation for community-led initiatives.
Months 5–6 **Systems & Hand-Off**	**Codified Editorial Architecture & Product Feedback Loops:** Codify editorial calendars, rapid-response playbooks, and sentiment dashboards into repeatable automated workflows. Embed bi-directional community feedback loops directly into OpenAI product and research roadmaps. Hand off daily execution to regional leads and autonomous monitoring systems, transitioning into ongoing advisory.

CORE COMMUNICATIONS & EXECUTION CAPABILITIES

- **Authentic Storytelling & Voice:** Published university textbook author; essayist with sharp editorial judgment, turning dense technical abstractions into gripping human stories.
- **Cultural Crossover & Earned Media:** Bridging frontier AI into mass culture—sports, fashion, music, design, culinary arts—securing earned attention beyond tech echo chambers.
- **Global Community Sourcing:** 5,000+ deep-dive founder conversations; managed Russia & CIS regional operations; skilled at identifying and elevating authentic grassroots voices.
- **AI-Native Comms Operations:** Architect of autonomous multi-agent operational swarms; automated sentiment ingestion, KYA verification, and formal policy/SEC comment filings.

SELECTED CAREER TRACK RECORD & NARRATIVE LEADERSHIP

Managing Partner & Chief Storyteller — *Mindrock Capital / Vestor.In* (2016–Present)
- Orchestrated narratives for $100M+ deployed in technology ventures. Pioneered AI-native communications and autonomous agent meshes, translating complex frontier algorithms into clear institutional narratives.

Author & Educator — *Venture Capital & Entrepreneurship University Textbook*
- Authored authoritative, voice-driven university textbook utilized in business schools across Eastern Europe; focused entirely on practitioner voice, founder resilience, and community trust without vanity promotion.

Decentralized Publishing & Community Building — *Nostr-First & Cross-Cultural Campaigns*
- Developed 30-day narrative distribution plans, multi-lingual campaign teasers (RU/EN/ZH), and the 'Serendipity Stalking' methodology. Mobilized decentralized communities across open protocols.

Investment Lead & Mentor — *Founder Institute Alumnus (2014) & Decile Start Fund*
- Conducted 5,000+ founder interviews; mentored first-time creators and students on positioning, story architecture, and pitching; structured regional accelerator hubs in San Francisco bridging global founders with US partners.

Transparency & Mandate Note: Positioned as an operator-storyteller bridging deep technical capability with authentic cultural narrative, rather than a conventional PR executive. Agent fleet throughput figures omitted pending independent verification. Single canonical reference to Lean corpus retained for layout optimization.
